

# CELL PHONE SAFETY AWARENESS MONTH

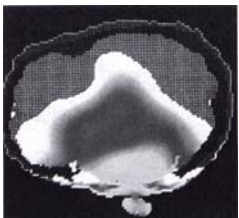

From the work of Dr. Om Gandhi, a computer-image comparison of the heads of adults and children (all adjusted to the same scale), showing that radiation penetrates younger skulls far more deeply than those of adults.

Radiation penetration in head of adult

Radiation penetration in head of 10 year old child

Radiation penetration in head of 5 year old child

## CHILDREN ARE AT THE HIGHEST RISK

### Scientific studies from around the world clearly show:

- Cell phone radiation disrupts fundamental physiologic and genetic functions in brain and blood tissue leading to problems that range from stress, fatigue, anxiety, attention deficit, autism and learning disorders to brain and eye cancer.
- Children and teenagers are at the highest risk because the radiation from the cell phone penetrates deep into the developing brain.
- Studies of adults show serious health risks after only a few years of cell phone use – no one knows for sure the extent of the damage that will be caused by life-long exposure of our children and teenagers.
- In 2002 about 40% of 12 year olds had cell phones.
- In 2004 - a study showed that in Buffalo, New York – children between 12 and 17 year olds were on the phone over 86 minutes a day and over 2500 minutes a month
- Now in 2008 those numbers have increased dramatically, estimation is that 80 to 90% of teens own cell phones.

# CELL PHONE SAFETY DO SOMETHING NOW

## **BREAKING NEWS...**

### **Cell Phones Are More Dangerous Than Smoking and Asbestos**

*CNN, Fox News and other Media Outlets are reporting a newly released study by a respected neurosurgeon, Dr. Vini Khurana, that shows a connection between cell phones and brain tumors. Dr. Khurana, a staff specialist neurosurgeon at the Canberra Hospital in Australia, conducted a 14-month investigation into cell phones and brain tumors reviewing more than 100 international studies on the dangerous connection and is sounding the alarm. "Malignant brain tumor incidence and its associated death rate will be observed globally to rise within a decade from now, by which time it may be far too late to meaningfully intervene, especially for those who are currently children and young adults," stated Dr. Khurana.*

## **BIOPRO ANSWERS THE CALL**

*"When the cell phone danger issue came to my attention, I knew I had to take action to protect my family. What I discovered was that BIOPRO offered the only scientifically patented solution. I have complete peace of mind in knowing that I'm doing everything possible to lessen the danger for the people I love."*

**John Williams, Dana Point, California, USA**

*"My education in natural medicine alerted me to the fact that Electromagnetic Radiation was a major health issue. When I found BIOPRO, I did my research and was convinced that its technology was not only valid, but also extremely effective."*

**Lynn Quiring, CCN, Chandler, Arizona, USA**

*"I've had the opportunity over the past 10 years to provide screenings to thousands of individuals and I've rarely ever come across a product that gave such an immediate response."*

**Dr. Steven McGregor, ND, Salt Lake City, Utah, USA**

**Steven McGregor is an independent, professionally licensed test administrator Certified by the Georgia State Naturopathic Medical Association with 10+ years of experience in MSAS testing**
